

Greetings Eligible Clinicians and Practice Managers,

I am Anthony Seabrook, owner and purveyor of Veritable Planning & Solutions, PLLC (VPS) based in Tampa, Florida. As a former Centers for Medicare and Medicaid Services (CMS) contractor and [IT Manager for Health Services Advisory Group \(HSAG\)](#), Florida's Quality Innovation Network - Quality Improvement Organization (QIN-QIO), I am very familiar with the CMS Quality Payment Program (QPP). Now, VPS is a [CMS approved Qualified Registry](#) providing data analytics and reporting services for the QPP. If you or your group have not selected a registry to submit your MIPS related data, please consider VPS.

Our qualifications are practically unmatched as we have 10 years as a CMS contractor developing and supporting the flagship web application deemed the ESRD National Patient Registry and Quality Measure Reporting System, CROWNWeb (www.mycrownweb.org). Additionally, we have over 15 years of technical assistance, training and support on quality reporting and data systems as a platform.

Our services include: Data Extraction, Data Retrieval for MIPS reporting of individual eligible clinicians/groups, Provider Comparisons, Inter-Rater Reliability (IRR), Customized Reporting and Data submission to CMS. Additionally, we support all QPP Registry Eligible Measures as well as Improvement Activities and Quality for Performance.

Lastly, it is our position that even in the event you are **not** required to submit data according to the published CMS CY 2018 guidelines (**i.e., <\$90,000 in billing or < 200 patients**), your voluntary submittal will prepare you for future inclusion in the MIPS program. Moreso, your voluntary submittal will also provide you with valuable feedback which can be used for strategic business planning going forward.

VPS is offering FREE data submission services to a limited number of eligible clinicians responding by COB January 5, 2018.
